

Frozen Yogurt Bark

What you need:

- 2 cups vanilla Greek yogurt or any flavour
- 1 cup sliced strawberries
- 1 cup sliced blueberries
- 1 tablespoon mini chocolate chips

What to do:

1. Line a medium baking sheet with wax paper.
2. Spread yogurt on top of the wax paper. The yogurt should be minimum about $\frac{1}{4}$ " thick. If you find that your yogurt is spread too thin in places, add a spoonful more.
3. Sprinkle strawberries, blueberries, and chocolate chips over the yogurt. Gently press the toppings into the yogurt.
4. Freeze for 2 - 3 hours or until the yogurt is set.
5. Slide the wax paper with the bark on top of it onto a cutting board and cut (or use your hands) to break it into pieces. Peel the wax paper off of the back of the bark. Store in an airtight container or Ziplock bag in the freezer for up to 3 months.
